September 2021

Garden Club Reports.....

Lee Holloway, member of the Garden Club, tells us that recently, someone dug up and discarded two mature plants for no apparent reason. One was a beautiful privet that Lee planted a couple of years ago, and the other was planted by another resident and it had been growing for several years. The Garden Club is asking that residents refrain from digging/pulling up and discarding plants just because they may not like them. If anyone wishes to work in the gardens, decide what is planted, or whatever, instead of taking it upon themselves to destroy what others have planted and looked after, they should join the Garden Club and help in their efforts.

If interested or for more info, call Lee Holloway @ 745-1607.

The Scoop.....

* Because residents were asking, Ken Jones advises that the recent **parking lot work** both behind the building and in the North West corner was to improve and correct drainage issues.

* Fred Hoener tells us that the **2021 Jacksonville Senior Games** offers women and men ages 50 and over the chance to compete in 10 sports and 4 activities. The sporting events include tennis, golf, bowling, basketball, cycling and swimming. The four activities are wii-bowling, Chinese mah jong, social bridge, and line-dancing. The rental office has brochures listing the date/time for each of the events and activities and information on how to register to compete. Deadline to enter is September 20 with various competitions taking place on specified dates from September 24 to October 2. And if you don't wish to compete there is a need for volunteers to help out at the venues.

* Monika says their **Bible Study** is great fun and growing and everyone is welcome to join. The next Bible study will be September 11 at 4:00 pm in the Pool Side Café. For more info, contact Monika at 904-745-1406 in 8M.

* **Arts & Crafts** are still going strong Sunday's from 2:00 to 4:00.

Feel free to join us and learn anything you like or teach us something new.

Knit Cro Pro Club News

by Dorothy Jones

I feel we must give credit to all those who so generously donated this month: Nancy Macdonald donated 2 baby blankets, 1 adult blanket, 2 stoles, 1 lap blanket and several bags to hold yarn. Fran Saul donated 1 adult blanket. Fred Hoener donated 4 hats and 3 hat/scarf sets. Grace Winter, 6 scarves and 1 stole; Leisla Sansom, 1 scarf; Sherry Jones, hat/scarf set and Malvina White, 4 hats.

The club donated a stole to Riverton Tower Senior Center and 2 adult blankets to First Fruit Ministries.

The big donation to other charities will be in November, so everyone is working hard to maximize the number of gifts.

The club meets Tuesdays at 2:00pm in the first floor snack area. You are welcome to attend and/or to donate should you wish to do so.

Restaurant Suggestion from Sherry

I was surprised and happy to find out that the Piccadilly Restaurant was still open. My sister and I are among the few people who like liver & onions and there are not many places that have it on the menu. So we were glad to know Piccadilly has it every day along with many other great selections. The staff was very helpful and friendly and we had someone frequently checking to see if we needed anything (be sure to tip this person).

Checkout their complete menu at piccadilly.com. Open 11:00am - 8:00pm.

Piccadilly Cafeteria

3216 South University Blvd - 904-721-2872

Mold & Mildew

The best way to reduce mold and mildew issues is to run the Air Conditioning to remove moisture in your unit, and keep your doors and windows closed. Fan Coil units in every apartment have cold water passing through a coil. As air blows over the coil, condensation occurs on the coil dripping water into the drain pan. The largest part of air conditioning is the removal of water. This cannot occur if your thermostat is set too high. Set your thermostat to a cool 72 degrees if at all possible. Do not change the thermostat when leaving your unit. Keep it set to that temperature. While you're out, the water is being removed from your unit.

Some residents enjoy warmer temperatures in their units even during the warm moist months. For these residents running the system cooler while you're out may be the answer to having less moisture in the unit. Less moisture equals less mold and mildew issues.

When showering, ensure your bathroom vent fan is running. Keep the bathroom vent fan running after a shower to remove excess moisture. For those residents who smoke, do so on the balcony. Airing out your unit by opening doors or windows brings mold spores and unwanted moisture. Using your bathroom vent to remove air brings in fresh air to replace it. This also helps when unwanted odors are present.

Welcome New Residents

Elba Osorio

Thomas Prince

Resident of the Month

Our winners for the up-front parking spot are sisters Sandra Ross and Linda Carter. They will be sharing the spot for the month of September.

Riverton Review

Contributions are welcome to include news, items of interest, tid-bits, and activity information. Email info to Alan Abel by the 25th of the month for inclusion in the next Riverton Review. Please type RIVERTON REVIEW into your email's Subject.
